*Contains 7% Slow Release Nitrogen from Pasteurized Poultry Manure and Methylene Urea.	

The Espoma Company • 6 Espoma Road, Millville, NJ 08332

Directions

One pound equals approx. 3 cupfuls

When to Use:

Feed any time grass is actively growing.

Where to Use:

For use on all lawns: Cool season grasses including bluegrass, fine fescue, tall fescue and perennial ryegrass. Warm season grasses including bent grass, Bermuda grass, St. Augustine grass, zoysia grass, and centipede grass.

Can be used on established lawns as well as new seed/sod installations. When applied at the recommended rates of application, this product will not burn grass and is appropriate for areas frequented by children and pets.

How to Use:

Apply to a dry lawn that has been recently mowed. Apply with either a drop or rotary spreader. Be sure to overlap slightly to avoid striping. For best results, water-in after the application if rainfall is not expected within 24 hours.

Rates of Application:

Established Lawns:

Feed at a rate of 4 lbs. per 1,000 sq. ft.

Cool Season Grass: Feed 3-4 times each year: early spring, late spring (optional), early fall and late fall.

Warm Season Grass: Feed 4-5 times each year; feed late winter, early spring, late spring, late summer, and fall.

New Lawns/Overseeding:

Feed at a rate of 4 lbs. per 1,000 sq. ft. Seed can be sown on the same day of application.

Sodding:

Apply to the finished grade soil prior to installation at a rate of 4 lbs. per 1,000 sq. ft.
