### **Northeast Nursery Hydroseeding & Contractors Mix**

A utility turfgrass seed mix offered at an economical price. This seed mixture features excellent varieties which provide quick cover for an economical price.

- 25% Inspire Perennial Ryegrass
- 25% Divine Perennial Ryegrass
- 25% Quickstart Perennial Ryegrass
- 15% Shademaster II Creeping Red Fescue
- 10% Moonshine Kentucky Bluegrass

#### **Uses:**

Residential or Commercial Lawns, Passive Parks, (mid season seeding on) Golf Course Roughs, Campus Lawns, Cemeteries, new housing developments and stabilization projects

#### **Adaptation, Growth Characteristics & Features:**

Moonshine KBG is a fast germinator and will adapt well. The perennial ryegrasses feature high endophyte levels which provide insect and disease resistance. Shademaster II Creeping Red Fescue will adapt well to shaded areas as well as poorly irrigated areas. This mix will germinate fast and will grow well in sunny conditions, resists disease and features good cold weather survival, exhibits good drought tolerance.

#### **Establishment / Maintenance:**

Rapid establishment when adequate, consistent moisture is provided. Wild Horse Kentucky Blue and Perennial Ryes will germinate in 5 -7 days. Apply Starter fertilizer at seeding and again three weeks following; for best establishment, apply a sea kelp based soil amendment / fertilizer at seeding and three weeks following. Germination is best when soil pH is between 5.8 – 6 .8. New lawns should be fertilized every three weeks until well established; rates may vary. Mow at 2” when new plants reach 3”.

Performs well in the Northeast with average to high fertility programs: 3 - 5# N per 1000 per season and test soil every two years to monitor conditions

#### **Seeding Rates:**

New Seeding: 4 – 8 lbs. per 1000 square feet

Overseeding: 3 – 6 however, not recommended for overseeding existing lawns

#### **Packaging:**

Heavy duty poly woven bags

Item#, 50 lb. / 20 per pallet
